VOLUME CONTENTS

Vol. 133 No. 1 May 1991

THE SECOND IRIS WORKSHOP

PREFACE vii

ERIC FOSSAT / The IRIS Network for Full Disk Helioseismology: Present Status of the Programme 1

G. GREC, E. FOSSAT, B. GELLY, and F. X. SCHMIDER / The IRIS Sodium Cell Instrument 13

BERNARD GELLY / The IRIS Data Management 31

P. HOYNG / The Velocity Sensitivity of Resonant Scattering Spectrometers Employing a Piezoelastic Modulator 43

A. BAIJUMANOV, SH. EHGAMBERDIEV, E. FOSSAT, G. GREC, S. ILYASOV, A. KAMALDINOV, SH. KHALIKOV, I. KHAMITOV, J. F. MANIGAULT, G. MENSHIKOV, S. RAUBAEV, and T. YULDASHBAEV / Global Oscillation Measurements at Kumbel Station in Frame of the IRIS Programme 51

J. T. HOEKSEMA and P. H. SCHERRER / The IRIS Network Site at the Wilcox Solar Observatory 57

Z. BENKHALDOUN, S. KADIRI, M. LAZREK, and H. TOUMA / Moroccan Participation in the Study of Solar Oscillations 61

P. L. PALLÉ / The Teide Observatory 65

S. EHGAMBERDIEV, S. KHALIKOV, and E. FOSSAT / General Presentation of a Single IRIS Site Raw Data Analysis Problem 69

SH. EHGAMBERDIEV and I. KHAMITOV / On the Calculation of Spurious Velocity Signal Produced by Atmospheric Differential Extinction in Whole Disk Oscillation Measurements 81

A. V. BRUNS / Some Peculiarities of the Power Spectrum of the 5-min Solar Brightness Oscillations 89

V. A. KOTOV, T. T. TSAP, and V. I. HANEYCHUK / 160-min Pulsation of the Sun: New Observational Results 95

V. M. GRIGORYEV and M. L. DEMIDOV / Concerning Five-Minute Variations of the Global Magnetic Field of the Sun 103

V. M. GRIGORYEV, M. L. DEMIDOV, and N. I. KOBANOV / Instrumental Capabilities of the Sayan Observatory for the Study of Oscillatory Processes on the Sun 111

HIROMOTO SHIBAHASHI / Attempts to Infer the Density Distribution in the Outer Part of the Sun from p-Mode Oscillations Spectrum 117

G. BERTHOMIEU and J. PROVOST / The Asymptotic Spectrum of Gravity Modes as a Function of the Solar Structure: Standard Solar Model 127

J. PROVOST, E. GAVRYUSEVA, V. GAVRYUSEV, and G. BERTHOMIEU / The Spectrum of Gravity Modes as a Function of the Solar Structure: Model with a Mixed Core 139

V. A. BATURIN, E. V. KONONOVICH, and I. V. MIRONOVA / Solar Convective Zone and Acoustic Oscillations 141

K. I. MARCHENKOV and S. V. VORONTSOV / Seismic Probing of Outer Regions of the Sun 149

ANNIE BAGLIN / Stellar Seismology from Space: the EVRIS Experiment on Board Mars 94 155

V. GAVRYUSEV, E. GAVRYUSEVA, and A. ROSLYAKOV / Statistical Analysis of Time Variations of ^{37}Ar Production Rate in Chlorine Solar Neutrino Experiment 161

Vol. 133 No. 2 June 1991

L. L. KICHATINOV / A Model of Solar Differential Rotation 177

R. BRAJŠA, B. VRŠNAK, V. RUŽDJAK, A. SCHROLL, S. POHJOLAINEN, S. URPO, and H. TERÄSRANTA / Solar Differential Rotation Determined by Polar Crown Filaments 195

B. VRŠNAK, D. PLAČKO, and V. RUŽDJAK / Calcium Plage Intensity and Solar Irradiance Variations 205

A. KEITH PIERCE / The Observed Limb Effect in Fraunhofer Lines, I 215

TAKASHI SAKURAI, MARCEL GOOSSENS, and JOSEPH V. HOLLWEG / Resonant Behaviour of MHD Waves on Magnetic Flux Tubes, I 227

TAKASHI SAKURAI, MARCEL GOOSSENS, and JOSEPH V. HOLLWEG / Resonant Behaviour of MHD Waves on Magnetic Flux Tubes, II 247

REKHA JAIN and B. ROBERTS / Magnetoacoustic Surface Waves at a Single Interwave 263

STEFAAN POEDTS and MARCEL GOOSSENS / On Poloidal Mode Coupling in the Continuous Spectrum of 2D Equilibria 281

VOLUME CONTENTS

I. S. HARDIE, A. W. HOOD, and H. R. ALLEN / Resistive Ballooning Line-Tied Boundary Conditions 313

N. SRIVASTAVA, A. AMBASTHA, and A. BHATNAGAR / Evolution of Helically Twisted Prominence Structures of March 11, 1979 339

H. S. HUDSON / Solar Flares, Microflares, Nanoflares, and Coronal Heating 357

S. W. KAHLER and R. W. KREPLIN / The NRL SOLRAD X-Ray Detectors: a Summary of the Observations and a Comparison with the SMS/GOES Detectors 371

A. O. BENZ, M. GÜDEL, H. ISLIKER, S. MISZKOWICZ, and W. STEHLING / A Broadband Spectrometer for Decimetric and Microwave Radio Bursts: First Results 385

SOLAR PHYSICS LETTERS:

CORNELIS DE JAGER and JUN-ICHI SAKAI / Elementary Flare Bursts Explained by Explosive Coalescence 395

L. KŘIVSKÝ, M. RYBANSKÝ, and V. RUŠÍN / Flares of Radio Type II and Coronal Emission in the Course of Cycle No. 20 399

Book Reviews:

G. Berthomieu and M. Cribier (eds.), *Inside the Sun* (H. S. HUDSON) 403

R. Kotthaus and J. H. Kühn (eds.), *XXIV International Conference on High-Energy Physics* (J. KLECZEK) 403

L. V. Mirzoyan, B. R. Pettersen, and M. K. Tsvetkov (eds.), *Flare Stars in Star Clusters, Associations, and the Solar Vicinity* (Z. ŠVESTKA) 404
